Wapsipinicon River

The Wapsipinicon River is a natural resource gem in the rural landscape of Northeast Iowa, and is affectionately known locally as “the Wapsi”.

The Wapsi Folklore
There are several stories about how the Wapsipinicon got its name. A common story has the young Indian maiden named Wapsi and the son of an Indian chief named Pinicon canoeing on the river on the eve of their wedding day. The jealous Float Foot sneaks along the shoreline, and shoots Pinicon through the heart. As Wapsi jumps to the aid of Pinicon, the canoe overturns, and the two lovers drown in the swift current. To commemorate the sad event, the Indians combined the names and called the river Wapsipinicon. Other stories portray a more Romeo and Juliet theme, and in some stories Wapsi is the man and Pinicon is the woman. The actual name of the river probably has nothing to do with Native American folklore.

The literal translation of the Indian name is White Potato, River or Swan, Apple River, referring to the Jerusalem artichoke plants that grow along the river bank.

Wapsi Key to Independence

You will begin your trip from Quasqueton Dam. The Wapsi is a widely travelled river, and you likely will have a very long day. The trip from Quasqueton to Troy Mills is about 13 miles. It is a one day trip. The trip from Troy Mills to Cedar Rock is about 16 miles. This is a one day trip. The trip from Cedar Rock to Independence is about 19 miles. It is a one day trip.

Enable coordinates on your GPS. You will need to arrange a shuttle to proceed. Consider spending some time in Independence. The town has many parks, restaurants, shops, museums, a movie theatre, and more. Call 319-334-7178 for information on things to do in Independence. Camping is available in Independence (319-334-6711) or in nearby county parks (319-636-2617).

Independence to Quasqueton
You can choose to begin your trip from Independence at either Knot’s Landing or Three Elms Access. The trip to Quasqueton is the most popular canoeing stretch of the river.

Wapsipinicon River

A Natural Resource Gem

The Wapsipinicon River is a natural resource gem in the rural landscape of Northeast Iowa, and is affectionately known locally as “the Wapsi”. The river corridor in Buchanan County is famous for its quality backwater wetlands and associated woodland habitat, and as such is listed as a Protected Water Area (PWA). The wooded corridor provides the bulk of wildlife habitat and quality fishing for Buchanan and several other Northeast Iowa counties. In addressing qualities for designating the Wapsi as a Protected Water Area, the Iowa DNR stated, “The Wapsipinicon River has the longest continuous stretch of natural and scenic river corridor in [the area], and quite possibly in the entire state.” The Wapsi is the prominent natural feature in Buchanan County, with many public access sites. Call 319-636-2617 for more information about public lands along the Wapsi.

River Routes
(for access amenities, see map on back)

Cutshall Area to Independence

You will begin your trip from Quasqueton Dam. The Wapsi makes for a wider stretch of river, and less likelihood of logjams or low water.

People looking for a shorter trip, may want to put in at Otterville – about a two hour canoe trip to Independence, dependent on water conditions. The trip from Otterville includes an increasing number of cabins, homes, and boats. If you wish to take out at Wapsi Access, you need to turn sharply left as you enter the suddenly wide reservoir above Independence. Paddle toward the road and homes that are visible far to the east. The Wapsi Access boat ramp is on the left. If you wish to proceed to the Bathing Beach, make your way southeast, past the railroad bridge, and look for the boat ramp on your left. You will encounter power boats and jet skis – be careful.

There is no portage around the Independence Dams. You will need to take out and arrange a shuttle to proceed. Consider spending some time in Independence. The town has many parks, restaurants, shops, museums, a movie theatre, and more. Call 319-334-7178 for information on things to do in Independence. Camping is available in Independence (319-334-6711) or in nearby county parks (319-636-2617).

Independence to Quasqueton

You can choose to begin your trip from Independence at either Knot’s Landing or Three Elms Access. The trip to Quasqueton is the most popular canoeing stretch of the river.

As you leave Independence, the landscape is flat, and dominated by silver maple and basswood. Oak-covered hillsides increasingly border the river as you proceed, and reach their peak downstream from the Iron Bridge Access. In fall, the colors are spectacular.

Plan for a good day-long trip from Independence to Quasqueton. Take time to rest on the numerous sand bars, and to explore the many areas of fine fishing. Shorter trip options are available by making the Iron Bridge Access a put-in or take-out point.

About half-way between the Iron Bridge Access and the Quasqueton Campground you will see a sign for Boies Bend Area. Beach the boats and take a walk up the steps to the picnic ground and latrine. A little more than a mile down from Boies Bend is the Frank Lloyd Wright House (Walter Home) at Cedar Rock. Look left for the boat house on the river. The historic home can be seen through the trees.

Tours of can be arranged by calling Cedar Rock in advance of your trip (319-934-3572). There are no picnic or restroom facilities at Cedar Rock.

From Cedar Rock, it is a short paddle to the Quasqueton Campground. Homes and cabins line the river in this quiet area. The river is wide here, and the portages and the chances of encounter logjams is almost zero. You will not encounter any bridges to gauge your progress, but there are short trip options. Near the beginning of the float, and again about halfway down river, you will encounter electric highlines crossing the river. This is the only highline along the entire river's many sandbars.

Clam shells, fossils, and interesting rocks can be found on most of the river’s many sandbars.

Quasqueton to Troy Mills Access

You will begin your trip from Quasqueton at the city access under the Highway 36 Bridge. This stretch of river is wider. There are no portages and the chances of encounter logjams is almost zero. You will not encounter any bridges to gauge your progress, but there are short trip options. Near the beginning of the float, and again about halfway down river, you will encounter electric highlines crossing the river. The river is wide here, and the Wapsi Access boat ramp is on the left. Safety on the River

Safety is a key part of an enjoyable trip on the river. Although the Wapsi is generally a safe and easy river to navigate, there are some things to know.

Be sure to wear life jackets. Accidents happen, even in shallow water. Other safety apparel include: footwear to guard against walking on sharp rocks and other objects; clothing that will protect against rain, sun, or cold weather; and sunglasses and/or a hat. It is also a good idea to pack a first aid kit - just in case.

Dams present hazards which should not be ignored. Locations of dams are shown on the water trail map. When you see a sign for a dam, be ready to get off the river. In the rare case that a sign is missing, keep a watchful eye for a portage path or take-out point upstream from a dam. The circulating current immediately downstream from a dam presents a serious hazard. Keep your distance.

Following periods of heavy rain or snowmelt, the Wapsi gets wild. Do not attempt to canoe the river while it is quickly rising, or at or near flood stage.

While navigating the river in a canoe, watch for rocks and logs just below the surface. The safe path through these obstacles often can be found by looking for a "V"-shaped current that marks the best water flow between objects.

Pay attention to the riverbank. Most stretches of river have a "cutbank" side where the current is eroding the riverbank, and a "deposition" side where sand and silt are being deposited. You may want to keep to the cutbank side where there is less of a chance of getting stuck on the sand or mud. However, you should be careful not to take the cutbank route if the current is moving quickly into a fallen tree, logjam, or rock pile. In these cases, walk or carry the canoe safely along the shallows or sandbars.

Fish and Wildlife

The Wapsipinicon River as it flows through Buchanan County provides some of the best fishing in Iowa. Some of the more sought after fish include walleye, northern pike, smallmouth and largemouth bass, crappie, bluegill, and channel catfish. The length limit on all bass is 12 inches.

Forests and forested wetlands border the vast majority of the river corridor. Dozens of tree species thrive in these forests. Silver maple is the dominant tree along the river bottomland. Willows occupy areas around the sandbars, and oaks are more common on the higher hills and bluffs. October is a great time for a fall colors trip.

Watchable wildlife abound, in and along the river. Bird life is spectacular. Great blue herons and kingfishers often usher paddlers as they float downstream. Bald eagles also use the river. They can be seen perched as they watch the water for fish, or soaring over the treeline. In 2007, the north half of the Wapsi corridor in Buchanan County was designated a Bird Conservation Area, noting the diversity of bird species.

On sunny days, turtles and other reptiles are commonly seen basking on logs and boulders. Most common are painted turtles, but softshell and snapping turtles also are likely to be seen. Frogs and toads can also be seen along the shoreline, and can be heard singing from wetlands in the river corridor.

Beaver, muskrat, and an occasional river otter are among the mammals found swimming in the Wapsi. Deer, groundhogs, mink, raccoon, and other mammals may be spotted along the shoreline. Look for tracks during sandbar rest stops.

Hundreds of species make the Wapsi their home. To the right is a fun checklist of some notable animals. See how many you can see!
